How to Livestream your Mass for Free
with an iPad and free app (Live:Air Action)

## Equipment & App Needed

1. iPad

2. iPad Mela Mount and Tripod
Recommended for stability during LiveStream
All available for purchase from Amazon

3. Live:Air Action (Free App)

Live:Air Action

Stream to any platform you want
From Facebook Live and YouTube, Live:Air Action can stream on every major video platform in 1080p HD. Even if you have your own streaming server, the app's 'Custom RTMP' option allows you to go live wherever you like.

Wireless Freedom
Opt out of cables and go completely wireless with Live:Air Action. Simply connect your iPad to any WiFi access point with an Internet connection and you're ready to stream live. Even if you don't have an Internet connection, Live:Air Action can record your content for upload at a later time.

Getting Started with Live:Air Action

Live:Air Action allows you to preview, monitor, and edit multiple video sources before broadcasting to one of many integrated platforms. Use the following instructions to configure video sources and streaming destinations, then begin live streaming.

CONFIGURE A VIDEO SOURCE
1. Download the Live:Air Action iOS app from the App Store.
2. Connect your iPad and video source(s) to the same Wi-Fi network.
3. Tap Add New Source in the source editor panel, then select a Teradek Device (Fig. 2-1).
4. Tap on a thumbnail to view it in the Preview panel (Fig. 2-2).

Fig. 2-1

SELECT A STREAMING DESTINATION
5. Tap the button on the upper right-hand corner. Fig. 2-1
6. Navigate to Broadcasting Destinations>Manage Destinations>Add Destination, then select a platform (Fig. 2-3). After entering your credentials, the platform will be added to the list of available destinations under Broadcast Destination. Multiple destinations can be added, but you can only stream to one destination at a time.
Fig. 2-2

BEGIN LIVESTREAMING
7. Tap the Go Live! button on the upper right-hand corner.
8. Tap either the Cut or Transition button to transfer the video over to the Program panel (Disabling the Preview panel will transfer the video directly to the Program panel from the Source panel).
9. To switch to a different destination, tap Broadcast Destination, then select a different platform.
